Maxion Jantıa breaks new ground. We have created a stronger wheel for heavy duty commercial vehicles.

- Disc thickness is increased from 14 mm to 16 mm and its disc profile is strengthened.
- Stronger disc!
- Stronger body!
- Stronger clamping!
- Stronger rims!

Maxion Jantaş breaks new ground. We have created a stronger wheel for heavy duty commercial vehicles.

Inner and outer surfaces are machined to reduce planarity tolerance to 0.2 mm

Thus; a better contacting of wheel to drum surface, exact clinching of outer wheel surface to each other in double mounting, more equal distribution of load on wheel and lowering the loosing risk of wheel nut to a minimum level.

Ventilation hole area is thickened to create a stronger structure

Thickness of rims is increased to 6.6 mm and HSLA (High Strength Low Alloy) is used.

| Vehicles of Usage | All heavy duty trucks and tippers (Mercedes, Ford, BMC, Renault, DAF, Volvo, Scania, MAN etc.) |

**5 TON CARRYING CAPACITY**

- **HERCULES**
  - **Wheel size:** 22.5 x 9.00
  - **Wheel reference:** 229154
  - **Disc thickness:** 16 mm ± 0.5 mm
  - **Rim thickness:** 6.6 mm
  - **Load capacity:** 5000 kg

**6 TON CARRYING CAPACITY**

- **MEGA HERCULES**
  - **Wheel size:** 22.5 x 9.00
  - **Wheel reference:** 229154 S
  - **Disc thickness:** 16 mm ± 0.5 mm
  - **Rim thickness:** 6.6 mm
  - **Load capacity:** 6000 kg

**6 TON CARRYING CAPACITY**

- **SINGLE MOUNT WHEEL**
  - **Wheel size:** 22.5 x 11.75
  - **Wheel reference:** 2920488
  - **Load capacity:** 4500 kg

**7 TON CARRYING CAPACITY**

- **SINGLE MOUNT WHEEL**
  - **Wheel size:** 22.5 x 11.75
  - **Wheel reference:** 2920907
  - **Load capacity:** 5000 kg
